PROFILE

31-year-old with interests from programming and web design to animation and psychology. Currently in the middle of a 'Full Stack .Net' development program, primarily to gain experience with mob programming and collaborative development.

EMPLOYMENT

JANUARY 2018 - MAY 2019

Atos AB, Norrköping

Second- and Third-line support

- General user and server administration via e.g. PowerShell for Active Directory and MS Exchange
- Developed some internal GUI-applications to speed up general user support. Coding language was PowerShell, mostly to make the applications open for future internal development.

JANUARY 2013 - FEBRUARY 2014

CSC Sweden AB, Linköping

IT-support for SAAB

- Created registry shortcuts and similar solutions to common, recurring User IT issues
- Continued development of own keyboard macro applications from previous employment at HP Computers, with i.a. support for pre-written templates and copy / paste support between nested Remote Computer sessions.

OCTOBER 2011 - APRIL 2012

HP Computers, Leixlip Kildare, Irland

IT-support for Swedish Posten & SKF AB

- Area of responsibility was mostly as head of e-mail support. Big focus on incident management and ticket flow.
- To speed up manual transfer of information between e-mail application and incident management system, I created a simple copy & paste keyboard macro application.
