## PROFILE

Senior developer who has spent the last few years split between shipping production software and teaching others to do the same. Comfortable across the whole stack, from infrastructure and databases to the front end, and equally at home leading a team or quietly replacing a 50,000-line stored procedure. Interests range from programming and web design to animation and psychology.

## EMPLOYMENT

2025 - PRESENT

Scania AB

Senior .NET and TypeScript developer

- Building a new ASP.NET and Angular application to replace a handful of legacy systems previously held together by Oracle Forms, Spring Boot, Python and ASP.NET MVC.
- Designed the cloud infrastructure using IaC (AWS CDK), and took ownership of the frontend architecture and large parts of the ASP.NET backend where needed

2021 - 2025

SALT - School of Applied Technology

Head .NET instructor

- Led ten three-month bootcamps and helped about 200 people grow into employable developers; also took responsibility for two Java bootcamps.
- Acted as lead and manager for multiple teams at a time, balancing technical coaching, emotional guidance, prioritisation, code review and group dynamics.
- Wrote and held lectures and labs, evaluated code, guided final product releases, and made harder calls about who wasn't ready to continue.

2011 - 2019, MULTIPLE ROLES

Atos AB, CSC Sweden AB, HP Computers

IT Administration & Support

- Managed second/third-line enterprise support, including Active Directory and server administration.
- Automated the repetitive parts: built keyboard-macro tools and internal PowerShell GUIs to speed up support, with niceties like pre-written templates and copy/paste between nested remote sessions.

## EXPERIENCE

C#, ASP.NET & Minimal APIs  
ReactJS & AstroJS  
Software Architecture

MS Azure  
Mob Programming  
Legacy System Modernization  
PowerShell  
Linux OS with Arch and NixOS  
Unity modding & data mining

Angular & TypeScript  
Entity Framework  
AWS together with Infrastructure as Code (CDK)  
Git, Github & GitLab  
Mentorship & Coaching  
Relational Databases (SQL)  
C++ and C  
PC building  
Game development with Godot

## EDUCATION

AUGUST 2015 -

Master of Science in Applied Physics and Electrical Engineering  
Completed courses: <https://mathiasviklund.com/intyg>

Linköping University

AUGUST 2014 - MAY 2015

Art & French in France

Åredalens Folkhögskola, Bagnol-sur-Céze, France

AUGUST 2009 - NOVEMBER 2012

Different University Courses

Linköping University

AUGUST 2006 - JUNE 2009

Gymnasium with focus on natural science and Programming.  
Final project focused on PHP

Hagagymnasiet, Norrköping
